Erratum: Energetics of Si(001) [Rev. Mod. Phys. 72, 593 (2000)]

H. J. W. Zandvliet

(Published 27 February 2001)

On pg. 595, right column, the last sentence should read “Hence $\varepsilon_{\parallel(\perp)}$ refers to the nearest-neighbor interaction between unit building blocks ($2a \times 2a$) along (perpendicular to) the substrate-dimer-row direction, and δ refers to the second-nearest-neighbor interaction.”

On pg. 597, left column, the last sentence should read “This result follows immediately from the random distribution of kinks in a step at equilibrium (i.e., $\langle (h_0 - h_r)^2 \rangle = \langle k^2 \rangle r$).”
