# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
	<i>Frans H. J. M. Coenen and Thomas Hoppe</i>	
<b>2</b>	<b>“What Are Energy Communities Under the EU’s Clean Energy Package?”</b>	<b>23</b>
	<i>Joshua Roberts</i>	
<b>3</b>	<b>Community Energy in the Eastern Baltic Sea Region: From Standstill to First Steps</b>	<b>49</b>
	<i>Salvatore Ruggiero, Henner Busch, Aljosa Isakovic, and Teis Hansen</i>	
<b>4</b>	<b>Clean Energy Transition in Southeast Europe: The Paradigm of Greece from a Fossil Fuel Mediator to a Community Energy Hub</b>	<b>75</b>
	<i>Nikolaos Ziozas and Theocharis Tsoutsos</i>	
<b>5</b>	<b>The Community Energy Sector in Italy: Historical Perspective and Recent Evolution</b>	<b>97</b>
	<i>Chiara Candelise and Gianluca Ruggieri</i>	

<b>6</b>	<b>Community Energy in Germany: From Technology Pioneers to Professionalisation under Uncertainty</b>	119
	<i>Lars Holstenkamp</i>	
<b>7</b>	<b>Support Structures for Renewable Energy Communities</b>	153
	<i>Beau Warbroek</i>	
<b>8</b>	<b>Energy Communities Promoting Home Energy Savings: Interventions, Theory and Results</b>	179
	<i>Thomas Hoppe and Frans H. J. M. Coenen</i>	
<b>9</b>	<b>Creating an Enabling Policy Framework for Inclusive Energy Communities: A Gender Perspective</b>	205
	<i>Mariëlle Feenstra and Florian Hanke</i>	
<b>10</b>	<b>Housing Communities as Low-Carbon Energy Pioneers; Experiences from The Netherlands</b>	227
	<i>Lidewij Tummers</i>	
<b>11</b>	<b>Conclusion</b>	257
	<i>Frans H. J. M. Coenen and Thomas Hoppe</i>

## Notes on Contributors

**Henner Busch** is a Researcher at the Lund University Centre for Sustainability Studies and the Department of Human Geography at Lund University, Sweden. His work focuses on transnational municipal climate networks, community energy development, carbon lock-ins and questions of energy and transitional justice.

**Chiara Candelise** is Energy Economist and Policy Specialist, at ICEPT, Imperial Centre for Energy Policy and Technology (Imperial College London) and at GREEN, Centre for Research on Geography, Resources, Environment, Energy and Networks (Bocconi University). She is a leading expert on techno-economic and policy analysis of solar technologies, and on community energy and crowdfunding as innovative alternative financing for the energy sector. She also has work experience with both private and public institutions, including the UK Government Department for Environment, Food and Rural Affairs (Defra), and United Nations Development Programme. She founded the first Italian equity crowdfunding platform dedicated to the energy sector.

**Frans H. J. M. Coenen** is Associate Professor within the Faculty of Behavioural, Management and Social Sciences of the University of Twente. Over the years, his research particular has focused on local and regional sustainable development and capacity development for sustainable development. He takes a special interest in participation in sustainable develop-

ment in relation to the quality of environmental decision-making. He specialises in environmental policy planning and in public policy evaluation. At this moment, he is involved in several research projects in the field of renewable energy and the local energy transition.

**Mariëlle Feenstra** is a Senior Consultant and Affiliated Researcher of the University of Twente, the Netherlands. She wrote the first-ever thesis on gender-aware energy policy with case studies from Uganda and South Africa as a University Twente master student in 2002. She worked for fifteen years as a policy advisor for municipalities in the Netherlands specialising in European Affairs. In her PhD research “Gender Just Energy Policy: engendering the energy transition in Europe” (July 2021) she combined her academic interest with her policy experience. Her contribution has been acknowledged both in academia and in practice by invitations to participate in policy formulation activities for the FEMM Committee of the EU Parliament and the European Institute of Gender Equality.

**Florian Hanke** is a social scientist at the European University Viadrina. He received a PhD scholarship from the Heinrich-Boell Foundation. Focusing on questions of equity and justice in the European energy transition, he investigates energy communities’ contributions to a just energy transition. He holds a BA in International Business and Economics and a MA in European Studies.

**Teis Hansen** is Professor of Innovation and Entrepreneurship at the Department of Food and Resource Economics, University of Copenhagen and Senior Research Scientist at the Department of Technology Management at SINTEF (Trondheim, Norway). His research focuses on sustainability transitions, bioeconomy, regional development, transformative innovation policy, and the foundational economy.

**Lars Holstenkamp** is co-leader of the junior research group “SteuerBoard Energie” at Leuphana University of Lüneburg’s Institute of Sustainability Governance, and board member of the ECOLOG Institute for Social-Ecological Research and Education, Lüneburg. Until 2020, he has been working at the Institute for Banking, Finance and New Venture Management at Leuphana University. He holds a Dr. rer. Pol. from

Leuphana University. He has studied economics and African languages at the University of Hamburg; and economics, specialising in development economics, at the University of Trier. His research foci include the financing and governance of renewable energies, especially community ownership and sustainable finance.

**Thomas Hoppe** is Associate Professor within the Faculty of Technology, Policy and Management at Delft University of Technology. His research line is about the governance of energy transition in cities and regions, focusing on low-carbon cities, policy and social innovation. This more specifically includes community energy and co-creation. Dr Hoppe has been involved in multiple European Union funded research projects (i.e., Horizon 2020; Interreg) and has co-edited eight special issues in academic journals. He is chairman of the Platform of *Social Innovation in the Energy Transition*, and is on the Editorial Board of *Energy, Sustainability and Society* (ISSN: 2192-0567).

**Aljosa Isakovic** is a PhD student at the Department of Geography of Christian-Albrechts-Universität zu Kiel, Germany. His research focuses on regional energy transitions in the Baltic Sea region. By applying concepts from economic geography, the goal of his research is to develop a deeper understanding of the role of intermediaries in regional energy transition processes.

**Joshua Roberts** is currently Senior Policy Advisor of REScoop.eu (European Federation of Citizen Energy Cooperatives). He led REScoop.eu's advocacy efforts on the Clean Energy for All Europeans legislative package, in particular new provisions that acknowledge and support energy communities as new market actors in the energy transition. A qualified lawyer in California since 2010, Josh has been actively involved in the European energy policy debate since 2012, focusing on issues related to the internal energy market, renewables and other distributed energy resources, infrastructure, and community/citizen participation.

**Gianluca Ruggieri** is an environmental engineer, and since 2006 he is an Assistant Professor in Applied Thermodynamics and Heat Transfer at the Department of Theoretical and Applied Sciences of Università degli Studi dell'Insubria (Varese, Italy). He took part in several European projects and in countless local initiatives for the promotion of energy

sustainability. He is one of the founding members of *ènostra*, currently acting as vice president. His main research interests include end-use energy efficiency policies and technologies, building materials and building physics, and community energy.

**Salvatore Ruggiero** is a Research Fellow at the Centre for Consumer Society Research, University of Helsinki, and Postdoctoral Researcher at Aalto University School of Business, Finland. His research concentrates on actors and agency in socio-technical transitions, energy communities, social acceptance of renewable energy technologies, and business model innovation for energy flexibility.

**Theocharis Tsoutsos** is a Professor in the Chemical & Environmental Engineering School, Technical University of Crete, Director of Graduate Programme “Environmental Engineering” (2014–2018), as well as Founder and Director of the Renewable and Sustainable Energy Lab (2005–). He has taught in universities such as the Open University (UK), Kingston, Herriot-Watt, West Attica, and the Greek Open University. Theocharis has working in Sustainable Energy and Mobility for 30+ years and has coordinated 50+ European projects. He was Head of the Development Department of the Centre for Renewable Energy Sources and Saving—CRES (1992–2005). Theocharis is the author of 400+ scientific publications in international journals and proceedings, and has achieved 5000+ citations (Scholar) with h-factor:30(Scopus) and 36(Scholar). He is currently an editorial board member of *Sustainable Cities and Society* (Elsevier); *Energies*(mdpi); *AIMS Energy*; *Current Sustainable/Renewable Energy Reports*(Springer-Nature).

**Lidewij Tummerts** commutes between Rotterdam and Hannover. In 2000, she founded the office *Tussen Ruimte* (Intermediate Space) in Rotterdam (NL), and has since specialised as a technical advisor for self-organised housing, gender+diversity in spatial planning, and climate-neutral building. *Tussen Ruimte* advises building groups in building and technology decisions and planning departments in European cities and regions on integrating self-organised housing communities in sustainable urban development. Since 2006, Tummerts has been teaching at various European architecture and urban planning faculties. Her dissertation

(TU Delft, 2017) applied a feminist approach to investigate the transformative potential of self-organised housing in the European context, by the example of energy systems.

**Beau Warbroek** is Postdoctoral Researcher within the Department of Civil Engineering at the University of Twente. He holds a PhD in Policy Studies from the Department of Governance and Technology for Sustainability (CSTM) at the same university. Dr Warbroek's research line is about the citizen-based energy transition, in particular focusing on low-carbon energy initiatives. He has multiple publications in international peer-reviewed journals (including *Energy Research & Social Science*) and has presented his work at several international conferences, such as the International Conference on Public Policy and the Royal Geographical Society (with the Institute of British Geographers) International Conference.

**Nikolaos Ziozas** is a Research Assistant at the Renewable and Sustainable Energy Systems Laboratory (ReSEL), Technical University of Crete. Nikolaos holds a Diploma in Mechanical Engineering from the Aristotle University of Thessaloniki, and specialises in building energy design. His main research interest is the interdisciplinary examination of the ongoing community energy revolution as well as the critical role of civil society within it. His main research projects draw upon theories and methodologies from socio-technical energy transitions and the energy policy field, focusing on the Multi Level Perspective and Strategic Niche Management frameworks. His MSc thesis, entitled "The Role of Civil Society in Community Energy niche: A case study of Greece", was the first research on the emergence of community energy in Greece from both an empirical and socio-technical approach.
