

Alberto Martinetti
has successfully completed the
Tech for Sustainability Campaign 2023
in the challenge
Educating for Sustainability
as
1st place

Tech for Sustainability is a global initiative for students, researchers, startups, and innovative individuals to leverage technology to solve real-world sustainability challenges and shape our future along with **Siemens**. Participants could choose one of seven challenges and worked on real problems by submitting their ideas or participating as hackers.

From October to March 2023 in the **Tech for Sustainability Campaign** 152 ideas were developed. 21 idea teams were chosen by **Siemens** and participated in a hackathon with a final pitch in front of top management.

**We acknowledge Alberto Martinetti for the demonstrated
Leadership, Mentorship, and Growth Mindset**
