

SEMINARS

Laser Physics and Nonlinear Optics research at the University of Twente

Klaus Boller

September 2nd, 2008

KLAUS BOLLER and ROLF LOCH
University of Twente
THE NETHERLANDS

In this seminar an overview will be given of the research activities of the Laser Physics and Nonlinear Optics group of the University of Twente (Netherlands). The reseach program covers research on lasers, extreme ultraviolet optics and nonlinear optics up to ultra high intensities. The current research activities on High Harmonic Generation will be discussed to more detail.

Rolf Loch

Seminar, 2nd of September, 12:00h. Conference Room

Hosted by Prof. Jens Biegert
