

# Corrigendum to: Estimating Hierarchical Constructs using Partial Least Squares: The Case of Second Order Composites of Factors

Jörg Henseler

January 3, 2019

In van Riel et al. (2017), an inaccuracy appears in the description of the matrices. On page 467, the matrix  $S^*$  is incorrectly described as the matrix of consistent correlations between the first-order constructs, while  $S^*$  actually should refer to the first-order construct score correlation matrix (i.e., the correlations between first-order constructs without correction for attenuation). These correlations are also reported in Figure 6, where they are again incorrectly labeled as consistent.
