ERRATUM

The original version of this article [1] contains an error in the Optimization section. The parameter set \mathbf{x} shown in Equation 2 features a parameter s which was later removed and not used in the optimization. Therefore, the correct parameter set is given by:

$$\mathbf{x} = [\begin{array}{l} [\Psi], [n_n], \\ [\theta_1, \dots, \theta_{n_s}], [a_1, \dots, a_{n_s}], \\ [o_1, \dots, o_{n_s-1}], [d_{1,1}, \dots, d_{n_s,2}], \\ [t_{1,1}, \dots, t_{n_s,n_b}], [l_{1,1}, \dots, l_{n_s,n_b}] \end{array}] \quad (1)$$

As a consequence, the total number of parameters stated in the same section of the original version is also incorrect. The correct total number of parameters is 31.
