

Andreas Weber  
Assistant Professor  
Science, Technology & Policy Studies  
Digital Society Institute

## Personal profile

Andreas Weber is an assistant professor in the department of Science, Technology and Policy Studies (STePS). Most of his research and teaching examines the relationship between **Science, Technology and Culture** from a long-term and global perspective. Andreas has a special interest in the history of natural history and chemistry in insular Southeast Asia and Europe. This includes research into how

computational technologies can be used to increase access to and learn from biodiversity heritage collections gathered in colonial Indonesia. His research in the digital heritage domain also allows him to reflect upon how the growing use of computational technologies impacts research in the humanities, and, more generally, our understanding of culture and technology in society. From September 2020 onwards, Andreas is also develops and coordinates PhD training for WTMC - the Netherlands Graduate Research School of Science, Technology, and Modern Culture.

Characteristic of Andreas' work is that he combines in-depth archival research with more conceptual thinking. Andreas is editor of the book series Emergence of Natural History (ENH), published by Brill publishers, and is associate editor of the international journal Itinerario. Journal of Imperial and Global Interactions. Itinerario is published by Cambridge University Press (CUP).

Andreas has also co-curated an internationally well-received museum exhibition on the history of recycling. The exhibit was on displayed at the Dutch National Museum for the History of Science and Medicine (=Rijksmuseum Boerhaave) in Leiden from 2015 to 2016, and the Fries Museum from 2016 to 2018. This exhibition has received an 'honorary mention' award in the context of the 2016 international Dibner Award for Excellence in Museum Exhibits competition of the American Society for the History of Technology (SHOT).

In early 2019, Andreas also won the Young Talent Award of the Faculty of Behavioural, Management and Social Sciences of the University of Twente.

Andreas holds a MA degree (2005) and a PhD, both from Leiden University (2012). In 2015-2016, Andreas was a John C. Haas fellow of the Science History Institute in Philadelphia. Andreas has also obtained a 1. Staatsexamen (=first degree in teacher's training to teach at German gymnasia) in History and German Language and Literature from the University of Bamberg (2006).
